Islamia college	2020-2022
Matriculation : Computer Science	Grade : A
Govt . Boys High School Lahore	2018-2020

Experience

Portfolio Project

Created a personal portfolio website to showcase web development projects and skills. Focused on clean design, responsive layouts, and easy navigation for an engaging user experience.

Self Project

I am currently leading the development of an international website for a cost estimation company, focusing on creating an intuitive and scalable platform. This project involves overseeing the design, functionality, and deployment phases to ensure the website is responsive across global markets. The website aims to provide accurate, user friendly cost estimations while improving operational efficiency. The project is expected to be completed, with a focus on enhancing the customer experience and business operations.

Gym Website

Built a simple gym website using Bootstrap, featuring different sections like Home, Services, About Us, and Contact. Utilized Bootstrap's grid system to create a responsive layout and incorporated pre built components like navigation bars, cards, and buttons to enhance user interaction and design consistency.
